- Sharing knowledge with team members
- Providing clear commitment of actions and findings

## Case study 1

### A Major International Wholesaler Servicing the FMCG Industry

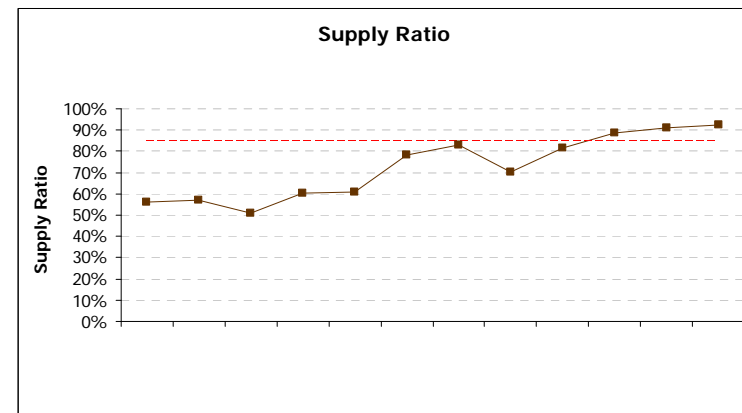

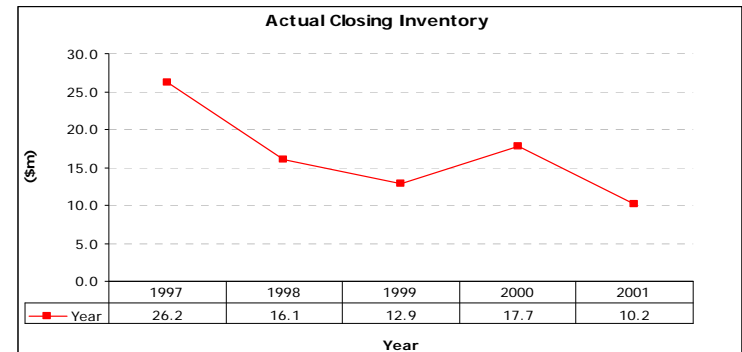

- **Inventory Holding excessive**
- **Planning methodology disjointed**
- **Customer Service ranked as worst in the sector**
- **Significant customer complaints**

### Task

Scoped and implemented Key Account Stock Management planning system that aligned forecast to demand reducing inventory held from \$26.2 to \$10.2m on an increased sales base of 15 % over the same period.

### Outcome

- Improved supply ratio from 60% to 95%:
- Reduced shrinkage
- Established accurate sku data (99% for entire Asia Pac region)
- Improved order to delivery fulfillment
- Increased customer order and delivery fulfillment
- Achieved 100% catalogue delivery

## Case study 2

**A global FMCG business servicing all major retailers across Australia and NZ.**

- **Warehouse methods labour intensive**
- **Significant double handling**
- **Inventory & Despatch accuracy poor**
- **No barcode or radio frequency scanning**

### **Task:**

Prepared and delivered a strategic warehousing review that consolidated 5 warehouses of 37500m2 to a single site of 20000m2.

Scoped, selected and implemented new WMS

### **Outcome**

Relocated 16500 pallets over the peak season within a 6 week period (whilst continuing day to day business without impact to customer order delivery timing).

Implemented WMS on-time and on budget

Reduction in double handling

Significant reduction in despatch errors

Implemented Radio Frequency scanning

Significantly reduced costs \$m 4.5 p.a in a 2 year period

Achieved 99% accurate DC bookings

Achieved 98%+ delivery performance across 1800 delivery locations

\* Independent assessors Benchmarking Success carried out the study of this supply chain. It placed the performance in an elite group, the top 10% of 130 retail suppliers in Australasia.
